Calicut, Kerala, India

Professional Summary

Final year MCA student with proficiency in Python, Java, and C, and hands-on experience in Django-based web application development. Used basic AI logic (content-based recommendation) to personalize learning materials for users. Strong foundation in computer fundamentals including DBMS, OOPS, and software development principles, with a keen interest in building efficient and scalable software solutions. Actively seeking entry-level job or internship opportunities across IT, software development, web development, AI/ML, and related technical roles to contribute to organizational success and achieve career advancement.

Technical Skills

- **Programming Languages:** Python, Java, C
- **Web Technologies:** HTML, CSS, JavaScript, Node.js
- **Frameworks & Libraries:** Django, React.js, pandas, Numpy
- **APIs & Integration:** REST API Development and Integration
- **Authentication and Security:** JWT (JSON Web Token) Authentication
- **AI/ML(Basics:** Personalized recommendation logic, data-driven features
- **Databases:** SQLite, MySQL, MongoDB
- **Tools:** Git, GitHub, VS Code
- **Concepts:** DBMS, OOPS, Machine Learning (Basics)
- **Other Skills:** MS Office, Operating Systems, Teamwork, Quick Learner, Critical Thinking, Problem Solving

Academic Projects

AI Based Personalized Learning Platform

Python, Django, HTML, CSS, JavaScript, Basic Machine Learning

- Developed an AI-powered personalized education platform using Python and Django.
- Implemented a content-based recommendation algorithm to suggest learning materials based on user activity and performance.
- Designed backend modules for authentication, content management, and progress tracking.
- Implemented CRUD operations for courses, users, and learning resources.
- Followed MVC architecture to ensure modular, maintainable, and scalable application design.

Lost and Found Management System

Python, Django, SQLite

- Developed a web-based Lost and Found platform using Python and Django to help users report, search, and recover lost items.
- Designed and managed database models to store lost and found item details, user information, and item status.
- Designed backend workflows to match lost items with reported found items.

Education

Master of Computer Applications (MCA)

MES College Of Engineering Kuttippurama, APJ Abdul Kalam Technical University
2026

Bachelor of Science

Farook College Autonomous, Calicut
2024

Courses & Certifications

- Full Stack Web-Development- SmartED in Collaboration with Microsoft
- Cloud Computing -NPTEL, IIT Kharagpur
- Essentials of Git- Sync N Spark

Strengths

- Strong problem-solving skills
- Quick learner
- Ability to work independently and in teams

Languages Known

- English
- Malayalam
