

Your Name

Kerala, India | your.email@example.com | +91-XXXXXXXXXX | LinkedIn | GitHub

Professional Summary

Experienced Python Developer with 3–5 years of expertise in building scalable web applications using Django and REST APIs. Strong background in PostgreSQL, Docker-based deployment, and integrating Machine Learning models into production systems.

Technical Skills

Languages: Python, SQL

Frameworks: Django, Django REST Framework

Databases: PostgreSQL, SQLite

Tools: Docker, Git, CI/CD

Machine Learning: SBERT, Scikit-learn, NLP

Professional Experience

Python Developer | Company Name | 2022 – Present

- 1 Developed scalable web applications using Django
- 2 Built REST APIs using Django REST Framework
- 3 Integrated ML models into production
- 4 Optimized PostgreSQL queries
- 5 Used Docker for deployment

Junior Python Developer | Company Name | 2021 – 2022

- 1 Assisted in backend development using Django
- 2 Created REST APIs
- 3 Worked with PostgreSQL
- 4 Debugged and optimized code

Projects

AI-Based Resume Screening System

- 1 Built using Django + SBERT
- 2 Implemented resume-job matching using cosine similarity
- 3 Developed candidate ranking system
- 4 Integrated ML into backend

Education

B.Tech / MCA | Your College Name | Year

Certifications

- 1 Python Development Certification
- 2 Machine Learning Certification
